

LOADING ARM ACCESSORIES

A loading arm consists of any number of swivel joints, pipe, and a balance mechanism. There are also numerous accessories that enhance the operation of a loading arm. A partial list of these accessories follows. If you do not see an item that you need, please call EMCO WHEATON.

E0064 Vacuum breakers

(Top or bottom loading)

Allows for the product evacuation of the loading arm after the valve is closed.

- ☞ 3/8" Threaded
- ☞ Materials: Brass, Stainless steel
- ☞ Seals: Viton, PTFE, Kalrez

Swivel joint handle

(Bottom loading)

This handle is used on the D0192 and D1086 bottom loading outboard swivel joints.

Assembly part # 454722

E0262 Spacer spool

(Bottom loading)

The E0262 Spacer spool allows for bottom loading applications to reach the recessed adapters on the transport trailers.

The addition of a shear groove serves as a shear section to assist in preventing major damage to the loading equipment if the trailer moves while connected.

E0090 & E0092 Flow deflector

(Top loading)

Flow deflectors fit on the end of the drop tubes to deflect flow while top loading.

☞ Available in 2" - 4" sizes in aluminum

Consult factory if other sizes or materials are required.

E3500 Lockdown assembly

(Top loading)

This lockdown device fixes the loading arm position during loading.

This safety feature protects operators from accidental spillage.

Loading valve remote control harness

Remote control units allow the operator to easily operate the loading valve from the end of a top loading arm.

The E0062 remote control is a "dead-man" style remote that automatically shuts the valve is the handle is released.

The E0095 is a lock-open remote control that locks open during loading. This remote incorporates a fusible link, which will melt in case of fire, allow the valve to close.
