

M503, M504 | PNEUMATIC CONTROL BOX

| M504-6/CAB – 6 compartment control box

| Rear view showing bulkhead pif's

| Lock and key detail

FEATURES & BENEFITS

- * Compact design for flexibility of fitting and weight reduction for increased payloads.
- * High Quality control valves have been designed specifically for the physical and environmental conditions associated with road transport.
- * Durability is inherent to the stainless steel, powder coated box housing and motor industry weather proof door seal.
- * Simple and easy to understand controls with positive feel and action.
- * Solid-state modular control valves minimise tube and simplify and circuitry for easy fitting and fault finding.
- * M503 series are supplied without the stainless steel box housing to allow tank manufacturers to incorporate in existing tool cabinet.

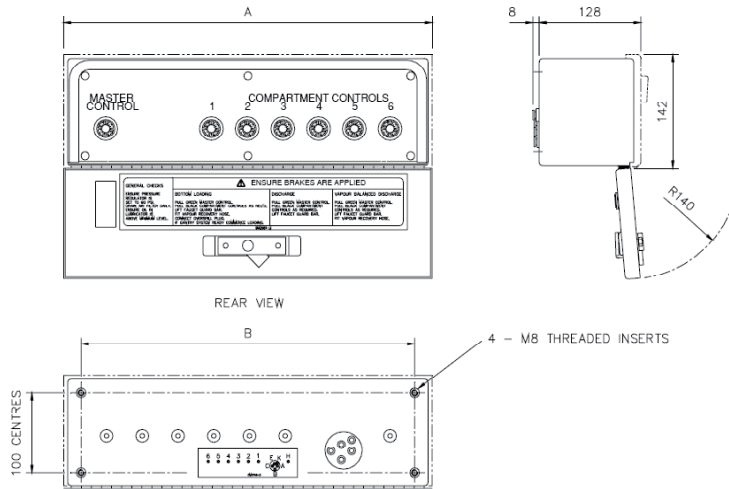

- * M504 series are supplied with the stainless steel box housing.
- * Valve status visual indicators can be incorporated if required. However, the standard is without to allow for remote fitting adjacent to API valves.
- * Lockable for security
- * Push In Fittings – 6 mm bulkhead at back of box.

This solid-state pneumatic control system has a proven track record for reliability in demanding tank truck and trailer usage conditions. Modular solid-state control valves and logic eradicate spaghetti-like tube mess. The lockable stainless steel cabinet protects the controls and gives added security. Numbered push in tube fittings (pif) at the back of the box allows easy circuit plumbing.
