

# MANHOLE COVER ORIENTATION

## ORIENTATION OF MANHOLE COVERS

All Emco Wheaton manhole covers, except the F0339 oval manhole cover, can be supplied as left-hand or right-hand configuration. This enables ancillary items, such as HLCO, dip tube or mechanical top operator, to be positioned on the tanker centre line.

- \* If the ancillary ports are to the left of the fillcap, the manhole cover is designated as left-hand.
- \* If the ancillary ports are to the right of the fillcap, the manhole cover is designated as right-hand.
- \* The hinge pin should always face the front of the tanker to ensure that the manhole cover falls shut in the event of a tanker driving away with the manlid open. This will ensure that the manhole cover will close to the first latch position.

*Better by Design*
